Management Report

In 2010 the principal business of NORDEKA JSC was passenger traffic on international, long-distance and regional routes.

The net turnover over the 12 months of 2010 amounted to LVL 9 601 506 which is LVL 192 095 or 1.96% less than in 2009 (including revenues from transportation services provided – LVL 5 298 949 and special-purpose subsidy – LVL 4 302 557). Revenues from inland carriage were 97.38%, international carriage – 1.67% and 0.95% of revenues were generated from other business activities.

The total commercial run (12 092 326 kilometers) was 1.63% less than in 2009 which is explainable with amendments in the Concession agreement on routes number decrease.

In 2010 Company closed branch in city Aizkraukle due to the changes in routes in accordance with Concession agreement part „ Centrs 1” (Center 1).

Gross profit of 2010 was LVL 1 155 520, which has decreased by LVL 4 324 or 0.37% comparing to 2009. The profit before taxes was LVL 249 072, which has decreased by LVL 106 289 comparing to 2009. 2010 results are explainable with the fact that in accordance with Concession agreement terms some routes were reduced or closed.

Profit after taxes in 2010 was LVL 192 744 that is a decrease by 29.71% or 81 467 LVL. In 2010 Company decreased loan liability with the biggest shareholder and as of 31.12.2010 remaining loan liabilities were 152 038 LVL only.

Company's solvency ratio (equity / assets) in 2010 was 0.245, compared to 0.23 in 2009. Solvency ratio increase demonstrates that the Company has increased its financial stability.

Company's liquidity ratio in 2010 was 0.64 versus 1.0 in 2009. Decrease in liquidity ratio is explainable by the fact that in 2010 the Company has undertaken new leasing commitments.

Company's return on assets ratio in 2010 was 2.539% compared to 3.712% in 2009 and based on total industry results ratio demonstrates that the Company is competitive.

In line with continuing modernization of the bus fleet, the Company has purchased 16 new and almost new buses “Setra” and as the result liabilities due to SIA “UniCredit Leasing” increased. Purchase of new buses allowed to decrease costs of spare part purchases for LVL 14 775 as well as improved total bus fleet aging ratio.

The highest price for the Company’s share in 2010 in „NASDAQ OMX Riga” stock exchange was LVL 0.70, the lowest – LVL 0.40. The share price in the first transaction in 2010 was LVL 0.67, but for the last – LVL 0.61.

New fuel control system “VIZORS” which was launched already in 2009 has resulted in fuel cost saving in 2010.

In 2010 the Company concluded the agreement with ice-hockey club “Rigas Dinamo” on provision of transport services that was a new type of service for the Company.

Management board and council remuneration is fixed and in 2010 comprised 4.26% from personnel costs and 0.0147% from total turnover.

In 2011 the course of development of the Company will largely depend on the Company’s ability to fulfill regulations of inland passenger transportation agreements stated in Concession agreement of 24 November 2008 “Public transportation services in regional intercity routes Nr.2008/01-K-C2/4-01 (Centrs 2); Nr. 2008/01-K-DR/3-01 (Dienvidrietumi); Nr. 2008/01-K-DA/5-01 (Dienvidaustrumi); Nr. 2008/01-K-A/2-01 (Austrumi)” and regulation of Cabinet of Ministers of the Republic of Latvia No 1226, approved on 26 October

2009 “Compensation of losses and costs arisen from public transportation services and the order of setting tariffs in public transportation”.

In 2011 the Company received notification from State Ltd.“Autotransporta direkcija” regarding possible reduction of subsidies for regional intercity routes. In case of subsidy decrease the Company will be enforced to decrease even more its expenses in order to fulfill the requirements based on Concession agreement. Despite of the situation described and existent obstacles, currently the Company continues to operate in good faith to comply with the conditions of the Concession agreement ensuring execution of all passenger routes regardless of probable revenue decrease in future.

Corporate Governance report of NORDEKA JSC will be submitted to „NASDAQ OMX Riga” stock exchange together with audited annual report of 2010.

During the period between the balance sheet date and the date of signing this report there have been no significant events that would have a material impact on the Company’s financial statements for the year 2010.

Net result after taxes is profit LVL 192 744.

The Board suggests to retain profit for the Company`s needs and transfer it to accumulated loss.

Annual report has been approved on 22 March 2011 by

Sergejs Zabavņikovs Chairman of the Board	Aleksandrs Žodžiks Member of the Board – Executive Director	Sergejs Konopijevs Member of the Board

Notes to the Financial Statements

1. Accounting policies

Basis of preparation of the Annual Report

The Annual Report is prepared in accordance with the law of the Republic of Latvia "On accounting" and "On the Annual Reports" and the following Latvian accounting standards (LAS) were applied:

LAS No 1 – “Preparation of financial statements”
LAS No 2 – “Cash flow statement”
LAS No 3 – “Events after balance sheet date”
LAS No 4 – “Accounting policies, changes in accounting estimates”
LAS No 5 – “Long term contractual agreements”
LAS No 6 – “Revenues”
LAS No 7 – “Fixed assets”
LAS No 8 – “Provisions”
LAS No. 9 – “Investment property”
LAS No.10 – “Lease”,
LAS No. 11 – “Inventory”.

The Profit or Loss Statement is prepared by applying the turnover costs method. The Cash Flow Statement has been prepared using the indirect method.
Financial statements are based on historical cost valuation method.

Accounting principles applied

The annual report has been prepared in accordance with the following policies:

a) going concern assumption – the Company will continue as a going concern;
b) evaluation principles are consistent with the prior year;
c) items have been valued in accordance with the principle of prudence, i.e.:
   - the annual report reflects only the profit generated till the date of the balance sheet.
   - all incurred liabilities and current or prior year losses have been taken into consideration even if discovered within the period after the balance sheet date;
   - and all impairments and depreciation have been taken into consideration irrespective of whether the financial result was a loss or profit;
d) income and expenses incurred during the reporting year have been taken into consideration irrespective of the payment date or date when the invoice was issued or received. Expenses have been matched with revenue for the reporting period;
e) asset and liability items have been valued separately;
f) the opening balance sheet matches the prior year closing balance sheet;
g) annual report contains all items, that have considerable influence in evaluation and economic decision making;
h) business transactions are recorded taking into account their economic content and substance, not merely the legal form.

Recognition of income and net turnover

Net sales represent the total of goods and services sold during the year net of discounts and value added tax. Revenue from the sale of goods is recognized when the Company has transferred to the buyer the significant risks and rewards of ownership of the goods and the amount of revenue can be measured reliably. Sales of services are recognized in the accounting period in which the services are rendered.

Other income is recognized as follows:
a) Income from rent – in the period for which it relates;
b) Income from fines and penalties – at the moment of receiving;
c) Dividends – at the moment, when declared.

State subsidies

In accordance with local regulations, the Company receives subsidies for particular passenger transportation and for used fuel. Received subsidies are recorded in income statement as revenue, when the amount of revenue can be measured reliably and it is probable that the economic benefits associated with the transaction will flow to the Company.

Expenses

Expenses are recognized in the period to which they relate. Borrowing costs are expensed in the period for which they relate and included in the position “interest and similar expenses”.

Intangible assets and fixed assets

Intangible assets and fixed assets are stated at historical net cost of accumulated depreciation and accumulated impairment losses, if any. Depreciation is not calculated for land. Depreciation has been calculated by the straight-line method over their estimated useful lives based on the following depreciation rates set by management:

Intangible assets:	%
Licences, software	20
Fixed assets:	
Buildings	5
Equipment and machinery	20
Transport vehicles	6 - 33
Computers and data storage equipment	5
Other fixed assets	6 - 33

Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An asset’s carrying amount is written down immediately to its recoverable amount if the asset’s carrying amount is greater than its estimated recoverable amount. The recoverable amount is the higher of the asset’s fair value less costs to sell and value in use.

Repairs and maintenance are charged to the income statement during the period in which they are incurred.

Construction in progress represents tangible non-current assets under construction and is stated at historical cost. This includes the cost of construction and other direct expenses. Construction in progress is not depreciated as long as the respective assets are not completed and put into operation.

Expenses related to leasehold improvements are capitalized as tangible non-current assets and depreciated over the lease period on a straight-line basis.

Any gain or loss arising on derecognizing of the asset (calculated as difference between the net disposal proceeds and the carrying amount of the item) is included in the profit or loss statement in the year the item is derecognized.

Investments in subsidiaries and associates

Investments in subsidiaries (i.e., in companies, in which the Company is holding more than 50% of share capital or which it is controlling in some other way) and associated companies (i.e., companies, in which the Company exercises significant influence but does not hold the controlling interest, in which it has a 20-50% stake of share capital) are stated at cost. After initial recognition, investments in subsidiaries and associated companies are stated at cost, less impairment, if any. If there are any events or changes of conditions indicating that the book value of investments in subsidiaries and associated companies could be irrecoverable, the value of the respective investments in subsidiaries and associated companies is reduced in order to establish reduction of their value. The Company recognizes the revenues from its holding in equity only to the extent to which the Company receives the share of accumulated profit of the subsidiary or associated company, which is gained after the date of acquisition of the subsidiary or associated company. The received part of profit, which exceeds such profit, is considered a recovery of the investment and is regarded as a reduction of the initial value of the investment.
Other investments are recognized at cost, less impairment, if any.

Accounts receivable

Accounts receivable are recognized and carried at original nominal amount less provisions for doubtful and bad debts. Provisions for doubtful and bad debts are recognized when the management considers that the collection of the full amount is doubtful. Provisions for bad debts are assessed by estimating the recoverability of each debt individually.

Inventory

Inventory is valued by applying the FIFO method. Inventories are stated at the lower of cost and net realizable value. Obsolete, slow-moving or deficient stock has been valued at net realizable value. When the net realizable value of stock is lower than its cost, provisions are created to reduce the value of inventories to its net realizable value.

Foreign currency

The functional currency of the Company is the Latvian national currency – lat (LVL). Financial statements are presented also in EUR and official Bank of Latvia rate of 0.702804 has been used for conversion.

Transactions denominated in foreign currencies are translated to lats at the official exchange rate established by the Bank of Latvia at the date of transaction. Monetary assets and liabilities denominated in foreign currencies are translated into Latvian lats applying the official exchange rate established by the Bank of Latvia at the last day of the reporting year. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are netted in the profit or loss statement.

Cash and cash equivalents

Cash and cash equivalents in the cash flow statement comprise the cash on hand, balances of current bank accounts and short-term deposits with an initial term up to 90 days.

Long-term and short-term items

Amounts to be paid, received or to be written off in a time period longer than a year after the balance sheet date are classified as long term items. Amounts to be paid, received or written off within a year are classified as short term items.

Finance leases

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of the ownership to the lessee. Minimum lease payments are apportioned between the finance charge and the reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

Operating leases

Leases where the lessor retains substantially all the risks and benefits of ownership of the asset are classified as operating leases. Operating lease payments are recognized as an expense in the income statement on a straight-line basis over the lease term. The commitments undertaken by the Company with respect to operating lease contracts are recognized as off-balance sheet liabilities.

Loans and borrowings

Loans and borrowings are recognized initially at the amount of proceeds received, net of transaction costs incurred. In subsequent periods, loans and borrowings are stated at amortized cost. Any difference between proceeds (net of transaction costs) and the redemption value is recognized in the income statement over the period of borrowings.

Borrowing costs

Borrowing costs are expensed in the period to which they are attributable. Amounts are disclosed in the income statement as interest and similar expense.

Due to suppliers

Due to suppliers represent current liabilities and are stated at their nominal value.

Accruals for unused vacations

Amount of accruals for unused annual vacations is determined by multiplying the average wage of each employee in the reporting year by the accrued but unused annual vacation days at the end of the reporting year.

Corporate income tax

Corporate income tax for the reporting period has been calculated in accordance with the requirements of the law of the Republic of Latvia "On corporate income tax", applying a 15% rate fixed by the law.

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Company’s liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the balance sheet date.

Deferred tax

Deferred tax is recognized on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and are accounted for using the balance sheet liability method. The deferred tax liability is calculated based on the tax rates that are expected to apply when temporary timing differences reverse. The principal temporary timing differences arise from different accounting and tax depreciation rates of fixed assets and unused tax losses. Where a deferred tax asset arises, this is only recognized in the financial statements where its recoverability is foreseen with reasonable certainty.

Related parties

Related parties are defined as shareholders who have significant influence over the Company, members of the Council and the Board of Directors, key management personnel, their close relatives and companies in which they have a controlling interest as well as associated companies.

Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of past events and it is probable that this commitment will require resources outflow from the Company and amounts can be reliably estimated.

Use of estimates and critical accounting judgments

The legislation of the Republic of Latvia require that in preparing the financial statements, the management of the Company make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of off-balance sheet assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported period. Actual results could differ from those estimates.

The following are the critical judgments and key assumptions concerning the future, and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year:

- the Company reviews the estimated useful lives of tangible fixed assets at the end of each annual reporting period;

  The management of the Company uses their judgment in estimating useful lives of tangible fixed assets and their assumptions may change and new amounts calculated.

- the Company reviews property, plant and equipment and assesses whenever events or changes in circumstances indicate that the carrying amount may not be recoverable;

  The Company calculates and records loss on impairment of property, plant and equipment on the basis of an evaluation of their future use, planned liquidation or sale. The Company does not believe that any material adjustments are needed due to impairment of the Company's assets considering the planned production and sales levels;

- the Company assesses recoverability of unused tax losses (see note 24);

  The Company recognized a deferred tax asset from tax losses carry forward in the amount of LVL 1 903 158 (2009: 1 734 471). The Company reviews the deferred tax asset at each balance sheet date and reduces it to the extent that it is no longer probable that sufficient taxable profit will be available to enable its recovery. Currently the Company assessed that there are sufficient taxable temporary differences which are expected to reverse in the same periods into which a tax loss arising from the deferred tax asset can be carried forward.

In 2009 changes in the agreements with bus stations were made. According to new terms the Company did not pay commissions for sold bus tickets; however the fee for entrance in the bus stations was significantly increased, and was added to cost of services provided.
In 2010 further amendments in agreements were made and Company was paying commission for tickets sold in bus stations that was calculated as interest from ticket price and recognized in income statement as "selling expense". As a result of above mentioned agreement amendments, cost of goods sold and selling expenses are not fully comparable with 2009 presentation.

Total	**73 149**	**104 082**	**97 511**	**138 746**

There have been no guarantees provided or received for any related party receivables. For the year ended 31 December 2010 and 2009, the Company has not recognized any provision for doubtful debts relating to amounts owed by related parties.

30. Legal proceedings

In 2008 the Company participated in the public tender for provision of public transportation services in Latvia. The Company won tender and signed Concession Contracts with State owned limited liability company "Autotransporta Direkcija" for 12 years term for provisions of public transport services on following route networks 'Centrs 2', 'Austrumi', 'Dienvidaustrumi', and 'Dienvidrietumi'.

The Concession Contract on route network 'Centrs 1' has not been signed due to the fact the tender results were challenged in the court pursuant to law. As of the date of approving these financial statements, the Company is involved in the status of the third party in court cases related to following route networks 'Austrumi', 'Dienvidaustrumi', and 'Dienvidrietumi' and 'Centrs1'.

31. Financial risks management

Credit risk
Such financial assets as cash in bank and debtors are exposed to credit risk. The Company's cash is deposited in leading financial institutions of Latvia. Credit risk control is carried out by reviewing potential counterparties before start of any cooperation. Debtors are closely monitored and debtors with increased credit risk are shown in annual report at net value less provisions for bad debts

Interest rate risk
The Company has non-current finance lease with variable EURIBOR interest rate. Therefore it is exposed to any changes in interest rates. The Company does not use any derivates for hedging.

Liquidity risk
The Company controls its liquidity risk by maintaining sufficient amount of cash or ensuring availability of funding using bank`s credit line.

Currency risk
The Company`s assets and liabilities that are exposed to currency risk are cash, payables, loans and current and non-current leasing liabilities. Foreign currency risk mainly arises from EUR currency. The Bank of Latvia has stated a fixed currency exchange rate for LVL against EUR, i.e. 0.702804. Bank of Latvia ensures that the market rate does not differ from the official rate by more than 1%. Therefore, the Company’s profit or loss due to fluctuations of the euro exchange rate is not material as far as the Bank of Latvia maintains the above mentioned fixed rate.

32. Events after balance sheet date

In 2011 Company received notification from State Ltd.“Autotransporta direkcija” on possible reduction of subsidies for regional intercity routes. In case of subsidy decrease the Company will be imposed to decrease expenses to fulfill the requirements stated in Concession agreement.

From the last day of the reporting year until the date of signing these financial statements, there have been no other events requiring adjustment of or disclosure in the financial statements or notes thereto.
